Art Unit: 1711

1. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants have failed to specify if the percent value range is a weight percent or mole percent. Furthermore, it is unclear if the claimed percent is based on the mixture or some other entity.

2. Claims 19-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants have failed to provide adequate enablement for the production of core-shell hybrid particles, wherein the core is predominantly polyurethane and the shell is predominantly polymer derived from an unsaturated monomer; however, applicants' claims encompass such a permutation.

3. The prior art rejections have been withdrawn in view of applicants' response.
